

## Strobe Warning Lights

- High intensity flashes for fast premises identification
- May be surface mounted or mounted on alarm bell housing
- 6 to 12 VDC operation in single unit
- Excellent visibility...widest angle coverage
- Weather resistant for outdoor use
- Available in clear, amber, red and blue.
- Low current consumption – 350 mA
- Provision made for Snap-In Tamper Switches – ADEMCO No. 112

### How to Order:

**710CL** Clear Strobe Light

**710AM** Amber Strobe Light

**710BL** Blue Strobe Light

**710RD** Red Strobe Light

**112** Tamper Switch for Closed Circuit

**Note:** Check local regulations for possible colour restrictions

## Console Sounder Mimic

The **Console Sounder Mimic (CSM)** is designed for use with all Ademco VISTA controls (except the UK 41xx UXM series) to remotely indicate console beeps, indicating whether the system status has changed following a remote command.

Applications include any location where the master console is too far inside the structure to be audible. Ideal for use with 5700/5800 wireless arming devices.

Connects to the Console Bus as an addressable or non-addressable device.

Mimics console beeps for AWAY, STAY ARMING and OFF commands via an internal piezo sounder. The CSM also features a red "ARMED" LED which lights when the system is armed (ARM = continuous, STAY = flashing) and green "READY" LED which lights when the system is ready to be armed.

### How to Order:

**CSM:** Console Sounder Mimic
